HEATING & VENTILATION

BESPOKE BUILDING CONTROL SOLUTIONS

As quality manufacturers of building control systems, Sarum have built up relationships with consultants, M&E contractors and building managers spanning multiple types of buildings and environments.

Our experienced system designers will work with you from concept with specifications through to manufacturing and ultimately, delivery.

Sarum Bespoke Controllers include:

- Fire alarm contacts 230v as standard, 24v on request
- Run-on timers for supply fans when interlocked with electric heater
- Door mounted isolator switch
- Panel live indicator
- 230v control circuit, 24v on request

Large range of ancillary equipment and accessories from stock and to order including:

- Airflow and filter pressure switches
- Emergency stop stations
- LPHW valves and actuators
- Damper motors
- PIR sensors
- Room thermostats
- Frost thermostats

Full replacement parts and spares supply

Technical support

12 Month Guarantee* on all products

Options:

- Inverter speed controls either built into the panel or IP66 remote mounted versions
- Electronic single phase speed controls
- Transformer speed controls
- Carbon dioxide sensors to control fan speed
- Pressure transducers to maintain constant pressure in the system
- Localised emergency stops to shutdown either the whole system or specific plant
- Remote user panels, from simple run and fault indicators to full remote mimic panels
- PLC controller with Modbus or BACnet capability
- Client logos and own branding as required

*Guarantee is conditional and covers replacement or repair of faulty items, excludes site labour costs or user damage.
